Over 70 years of expertise

Requirements have shaped our company from day one. It all began in **1946** with equipment for pharmacies, and evolved into laboratory furniture. Since then, the town of Hänigsen in Lower Saxony has been the home of our products, all of which are **Made in Germany.**

One team

»Our employees are not only the basis of our success, their passion contributes to the uniqueness of our products.«

Jens Buchholz

»We are grateful for a team that accompanies changes at all times and we are proud that so many colleagues have been loyal to us for decades.«

Kazim Doyuran

140 employees make up our core team in Hänigsen. These are supported internationally by a great many long-standing partners.

Steel – more than robust

Laboratories are set up for the long term. We work with **steel**, a material that lasts for many years and is also fully recyclable.

[1. About us](#)[2. Köttermann](#)[3. Service](#)[4. Products](#)[5. Safety](#)[6. Sustainability](#)[7. References](#)[8. Contact](#)

Durability

Steel is virtually **indestructible**. Steel laboratory furniture is made to meet the highest demands.

[1. About us](#)[2. Köttermann](#)[3. Service](#)[4. Products](#)[5. Safety](#)[6. Sustainability](#)[7. References](#)[8. Contact](#)

Resistance

Steel is resistant to **temperature fluctuations, corrosion, humidity, water vapour, water and acids**, including **fatty acids, organic acids, and inorganic acids**.

[1. About us](#)[2. Köttermann](#)[3. Service](#)[4. Products](#)[5. Safety](#)[6. Sustainability](#)[7. References](#)[8. Contact](#)

Recyclability

Steel is up to **100 percent recyclable**. The properties of the material remain intact with the same quality in every stage of recycling.

[1. About us](#)[2. Köttermann](#)[3. Service](#)[4. Products](#)[5. Safety](#)[6. Sustainability](#)[7. References](#)[8. Contact](#)

Sustainability

Multi-recycling capability: Steel can be recycled over multiple life cycles, thus avoiding **50 percent** of original **CO₂ emissions**.

More room for working safely

Tall apparatus needs a lot of space. Distillation and walk-in fume cupboards are ideal in this regard. Distillation fume cupboards feature an especially low worktop, while walk-in fume cupboards provide enough room for large apparatus.

** Alarm value

Specifically for handling radioactive substances

So you can work safely: Radionuclide fume cupboards protect against radiation and substance escape and are easy to decontaminate. For extremely stringent requirements, a fully welded stainless steel interior with few seams can be installed.

Safe and convenient

- ✓ Safe XXL storage space
- ✓ Top fire resistance, certified compliant with
 - **EN 14470-1** for flammable liquids
 - **EN 14470-2** for pressurised gas cylinders

Minimise hazards

- ✓ Store flammable hazardous substance safely
- ✓ Constant ventilation for a safe laboratory environment:
via your own fume extraction system, external or
integrated fan
- ✓ One-hand operation, automatic closure,
full-extension pull-outs
- ✓ Access restricted to authorised persons

Top safety for flammable hazardous substances

- ✓ Top **fire resistance class (Type 90)**
- ✓ Proven safety: Certified compliant with **EN 14470-1** and **GS**
- ✓ Doors and carcass double-walled and thermally insulated
- ✓ Automatic thermo-mechanical door closure in the event of fire
- ✓ Integrated port for fume extraction system

Tall cabinets

- ✓ Hinged or folding doors
- ✓ Optional automatic door closure
- ✓ Removable shelves and catchment trays or self-retracting pullouts in the event of fire

Underbench cabinets

- ✓ Hinged doors and/or pull-outs
- ✓ Optional second level of pull-outs
- ✓ Canister with fill level monitoring

Protection for your laboratory environment

- ✓ Safe storage of corrosive non-flammable hazardous substances, with acids and bases separated
- ✓ Cabinet carcasses and pull-out trays made of resistant polypropylene
- ✓ Liquid-tight drawers on low-friction PTFE strips with pull-out stop
- ✓ Removal of aggressive vapours by connection to the fume extraction system
- ✓ Corrosion-resistant locks and hinges
- ✓ Ideal for installation under high-performance fume cupboards

For your safety

Your **safety** is our priority. **All of our products** are **focused** on making your work as safe and seamless as possible. Paths should be short, opening furniture and fume cupboards should be easy, and tripping hazards should be avoided.

Certificates

Our constant aim is to fulfil all safety requirements. We therefore participate in all important **audits** and **certifications**. Recently, we again passed the surveillance audit for **ISO 9001**, **ISO 14001**, **ISO 45001** and **ISO 50001**.

Köttermann test laboratory

Laboratory fume cupboards play a key protective role in the handling of hazardous substances in daily work. They are built to meet the highest safety standards and are subject to stringent controls accordingly. Our **in-house test laboratory** in Hänigsen is one of the few test facilities in Germany suitable for the precise inspection of fume cupboards.

[1. About us](#)[2. Köttermann](#)[3. Service](#)[4. Products](#)[5. Safety](#)[6. Sustainability](#)[7. References](#)[8. Contact](#)

Room for quality

We are able to ensure the premium quality of our laboratory fume cupboards directly on site under **optimal test conditions in the test laboratory**. There we can immediately test and implement both modifications and further product development under ideal conditions.

A basis with added value

The **basis** for all of our products is **steel**, a **fully recyclable** material. Steel can be recycled over multiple life cycles, **avoiding 50 percent** of original **CO₂ emissions**.

Valuable resources

Our production processes are energy-intensive, so we not only pay attention to consumption, but also strive for replenishment and reduction. Our **lighting system** is linked to the intensity of solar influx, we meet **85%** of our heat demand with **waste heat** from a **nearby biogas power station**, and our **water treatment plant** reduces wastewater discharge. A **vacuum evaporator** reduces the wastewater volume of our coating facility by **98%**.

Operating transparently

We fulfil the high requirements we set for ourselves and demonstrate this in a transparent manner. **In 1997**, we became the first company in the industry to operate an **EN ISO 14001**-certified **environmental management system**. We are also certified for **quality management** compliant with **EN ISO 9001**, **occupational health and safety** compliant with **ISO 45001**, and **energy management** compliant with **EN ISO 50001**.
