CATALOGUE LAB-SAFE CAPS

The essential safety caps with a touch of innovation

ear Chromatographers,

We are pleased to offer you a range of safety caps with the quality excellence you deserve. You'll find a few innovations and the essentials for your needs. In addition to this range, you can ask us for other configurations on request and at no extra cost, as long as we use standard screw threads. We are committed to keeping our prices as attractive as possible, with fast delivery times. Please do not hesitate to contact us for a quotation and further information. We would like to thank you again for the trust you place in us every day.

Yours sincerely,

the team

Georg Von Schwartzenberg

The essentials of safety caps

06

An innovative range of exhaust filters

A range of safety caps for eluent HPLC

A complete range of safety waste HPLC solvents

Overfill detector for canister

20

Universal nuts, adapters, barbed fittings, miscellaneous

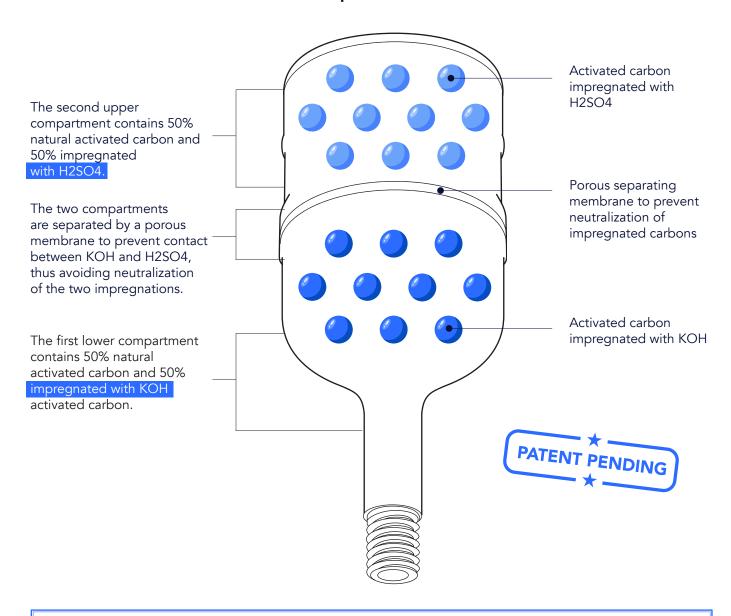

Canisters and retentions trays, large-volume funnels

An innovative range with

Large spectrum adsorption zero-emission exhaust charcoal filters

The new exhaust filters with large spectrum adsorption Zero-emissions feature two compartments.

The addition of activated carbon impregnated with KOH and H2SO4 eliminates inorganic acids and bases, which is not the case with conventional cartridges. Allows total neutralization of fumes.

All exhaust filters large spectrum plus are equipped with an anti-splash cover, a timer and a writing area to indicate the cartridge replacement date.

Anti-splash cover with timer. On request, add the letter T in the «References» section.

How to order

Description: Exhaust charcoal filter with large spectum adsorption ZE.

Service life: 1 year. Compatible with all existing systems except Vaplock.

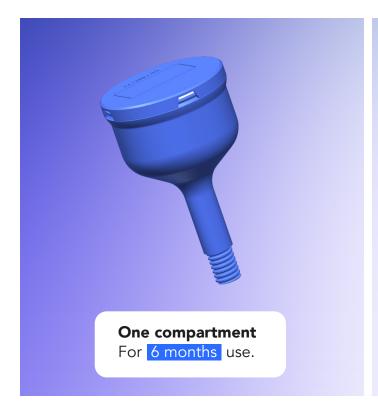

Part number:

Per 1 unit: | Per 10 units: | FS-EHC-ZE | FS-C10-ZE | For Vaplock system: | FS-EHC-ZE+VAP |

Classic exhaust charcoal filters high adsorption capacity

Classic exhaust charcoal filter with high adsorption capacity, one or two compartments.

How to order

- Service life: 6 months
- Part number:

- Service life: 1 year
- Part number:

Vaplock Standard threads compatible with all brands of caps except the VAPLOCK brand. Add the letters VAP at the end of the part number e.g

FS-EXH-M-VAP

Exhaust charcoal filters for very acidic or very basic eluents (other custom requests)

Special exhaust filters for strong acids or bases.

The three compartments contain separately:

One compartment filled with unimpregnated activated carbon.

And two compartments filled with activated carbon impregnated with KOH or activated carbon impregnated with H2SO4.

How to order

Description: Exhaust filter impregnated activated carbon with KOH for strong acids.

Service life: 1 year

Part number:

Description: Exhaust filter impregnated activated carbon with H2SO4 for strong bases.

Service life: 1 year

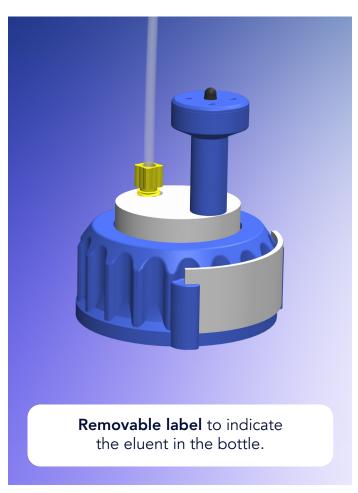

Part number:

FS-EXC-H2SO4

Lab-Safe caps for analytical systems

- Our Lab-Safe caps are fitted with a ventilation air valve based on duckbill technology. It has the advantage of being made of FDM.
- Our check valves are resistant to the full spectrum of solvents used in HPLC. This duckbill technology also resistantto strong acids and
- bases. Their sturdiness guarantees a year's optimal service life.
- They are equipped with a writing area allowing the replacement date to be noted. On request, they can be fitted with a time indicator (known as a timer); to do so, add the letter T in the 'References' section.

Ulfa

Lab-Safe caps pour col GL45

*Our check valves are designed to withstand strong acids and bases.

Remember to change the ventilation air valve every year.

How to order

Description: Ventilation air valve* for analytical HPLC system

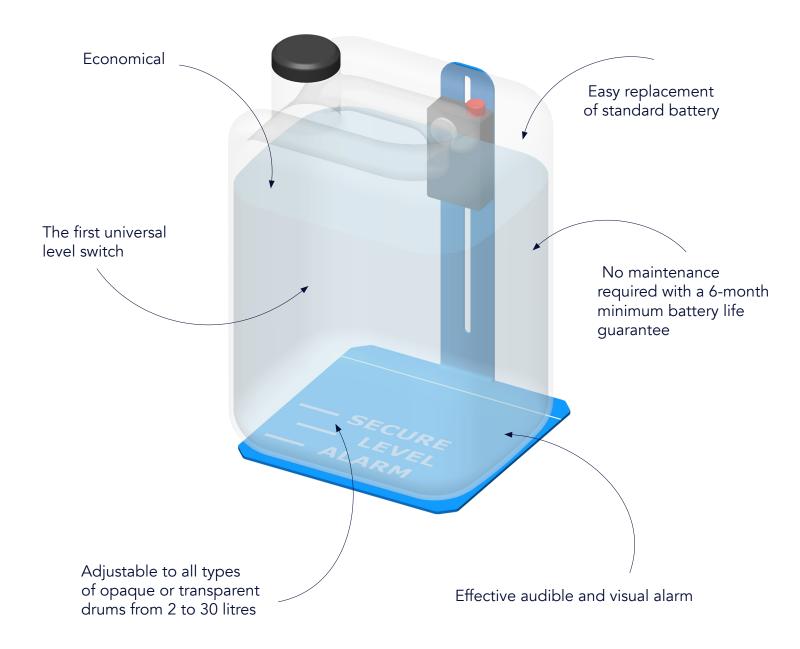

Part number:

Overfill level detector for canisters

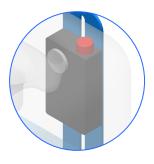

Not requiring any installation settings, the level switch is placed on the outside of the can - without contact

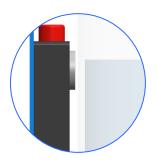

How it works

Step 1The detector is mounted on a sliding bracket.

Step 2Simply position the detector at the height you feel is necessary to prevent the can from overflowing.

Step 3There's no need to glue the detector to the side of the can.

Lab-safe waste caps for used solvents

Lab-safe WASTE caps are fitted as standard with:

- Grooved fittings for 6 to 9 mm tubes.
- 1/8" Tube nuts (these standard 1/8" nuts can be replaced by 1/16" nuts on request, when ordering).
- Equipped as standard with hose barb fittings for tubes from 6.4 to 8.8 mm.
- We offer the most commonly used models as standard.
- Finds fittings, nuts and obturators on page 22.
- On request, they can be fitted with a time indicator (known as a timer); to do so, add the letter T in the 'References' section.

Other configurations available on request. Send us the configuration you require, specifying the number of tubes to be connected and their outside diameters. Non-catalog requests will be processed promptly.

Flexible range of Lab-Safe waste caps

Other configurations are available on request at no extra cost. Find fittings, nuts and stoppers on page 22.
