SEALING PCR PLATES WITH CAP STRIPS

Strip caps provide the convenience of unsealing one row of wells on a plate at the same time. Flat caps enable labelling while domed caps provide the most secure seal when using thermal cyclers with a screw down lid. Use the flat, Xtra-Clear strip caps for Real Time PCR (qPCR), as these caps allow fluorescence signal to pass through.

Cap strips can be used on all Starlab 96-well plates except B1402-0595.

Plate Centrifuge.

YOU SPIN ME ROUND

The plate centrifuge makes the safe and quick spin down of droplets and condensation very easy. Sealed plates are loaded vertically into the centrifuge, and surface tension keeps samples in place so there is no danger of spills.

The plate centrifuge accepts all plate types (PCR plates, microplates, deepwell plates) up to 25 mm high. An optional adaptor is available for centrifuging 48-well PCR plates and 0.2 ml PCR tubes or strips. Use before and after thermal cycling to increase PCR yield.

- Accommodates two plates (max. plate height: 25 mm)
- Accepts skirted, semi-skirted and non-skirted plates
- Rapid start to stop
- Adapter for use with 48-well plates or PCR tubes
- Less than quarter the size of most plate centrifuges
