

NEW! NucleoVerde® Gel and PCR Clean-up

35% discount

NucleoVerde® Gel and PCR Clean-up is the ecological alternative to our trusted NucleoSpin® Gel and PCR Clean-up, our best-selling kit for DNA fragment purification from agarose gels and PCR reactions. Developed to meet the same high standards with significantly reduced environmental impact.

NucleoSpin® & NucleoVerde® Gel and PCR Clean-up

- One buffer for both PCR clean-up and gel extraction
- Easy visualization for optimal binding conditions with indicator
- High recoveries (up to 95%) for fragments down to 50 bp
- Fast preparation time: 6 preps in 10 min!
- Highly concentrated DNA due to minimized elution volume (15-30 µl) / (15-50 µl for NucleoVerde®)

Sustainability highlights NucleoVerde®

- Up to 41% less plastic in every kit
- Collection tubes made from ≥ 70% recycled plastic
- Bags produced with 80% biobased material
- Labels composed of > 95% post-industrial recycled material
- Up to 37% less cardboard
- Up to 36% total weight reduction
- Patent-pending buffer chemistry, no REACH hazard labeling required

Same price, same protocol, just greener!

More information and application data

NucleoSpin® Plasmid EasyPure

30-40% discount

- Fast preparation time: 6 preps in 14 min!
- Combined washing and drying step
- High yield: 15 - 30 µg
- LyseControl in lysisbuffer for visualization of alkaline lysis completion
- Easy handling with liquid RNase A
