Pioneer™ Balances

Affordable Balance to Achieve Reliable Results

The **Pioneer PX** combines **essential weighing functionality with competitive performance**, offering high accuracy and repeatability for applications in laboratory, industrial and education settings. **Durable design** with cast metal lower housing, sub-pan and stainless steel weighing pan. The PX is **affordably priced, intuitively designed for intelligent operation** with a second line display for additional information, and **USB and RS-232 connectivity** for easy communication.

MB Moisture Analyzers

Affordable Balance to Achieve Reliable Results

The **MB Moisture Analyzers** combine **precise weighing technology with efficient heating systems** to deliver fast and reliable moisture determination for a wide range of laboratory and quality control applications.

Featuring **robust construction and intuitive operation**, offering clear result displays, flexible drying methods and reliable performance for everyday use.

With **models ranging from simple routine instruments to advanced analyzers with touchscreen interfaces and method storage**, the MB series provides an efficient and cost-effective solution for moisture analysis.

Orbital Shakers

Endeavor™ 5000 Light Duty Shakers

Endeavor™ Light Duty Shakers are available in 3 models: 3 mm orbit, 20 mm orbit, or dedicated microplate model. All models can be used in incubators and cold rooms. Stable, accurate, long-term shaking is ensured with the triple eccentric drive and maintenance-free brushless DC motor. Integrated overload and unbalanced detection to protect samples.

Heavy Duty shakers & Extreme Environment Shakers

Powerful and reliable shaking performance for demanding laboratory applications designed for high load capacities (16 - 64 kg) while ensuring consistent and precise mixing for a wide range of workflows. With robust construction, accurate speed control and versatile platform options.

Extreme Environment Shakers are engineered to operate reliably in challenging laboratory environments such as CO₂ incubators, cold rooms and high-humidity conditions. This innovative design places the shaker inside the incubator while the controller remains outside for convenient operation. With durable construction and precise orbital shaking, they provide stable and repeatable mixing for applications such as cell culture and microbiological research.

NEW! CO₂ incubator ICO

The perfect environment for superior cell growth

Stable, homogeneous cultivation conditions for delicate cell cultures across research, development and clinical applications. Precise temperature control, active humidification and dehumidification plus optimised airflow management ensure **condensation-free stability inside the working chamber at 37°C and 95% RH**.

Technical specifications:

- Temperature range: +20 °C to +50 °C
- 4 model sizes: 56 to 243 litres volume
- Setting range CO₂: 0 to 20 %
- Setting range O₂: 1 to 20 %
- The new ICO will be certified with the ACT Label from MyGreenLab

NEW! Environmental Test Chambers TESTA

Reliable and Precise Environmental Test Chambers

Technical specifications:

- With Humidity Control (CT) or without Humidity Control (TT)
- Temperature change rate: up to 10 K/min
- Temperature range: -75 °C or -52 °C up to +180 °C
- Humidity range: 10–98 % rH
- State-of-the-art connectivity
- Premium quality

NEW! ULT Freezers

Reliable long-term ultra-low temperature storage with maximum sample protection

Combines consistent, precise temperature control with integrated safety features and energy-optimised design for continuous operation.

- Temperature range: –50 to –86 °C
- Dual cascade cooling system, optionally with inverter-controlled compressors (Eco Line) for high precision, energy efficiency and long service life
- High-power compressors and modern control technology ensure an optimal balance of performance and energy consumption
- Natural refrigerants, recyclable materials and energy-optimised components
- 7" touchscreen with intuitive interface and real-time display of temperature and process status

NEW! myChamber Control

Central platform for monitoring and controlling your Memmert equipment

- Central dashboard for all locations and devices
- User and rights management including Active Directory
- Real-time monitoring with live data from all devices
- Modern user interface
- Intuitive programme creation
- Intelligent notifications in case of deviations
- Optional FDA compliance with electronic signatures and audit trail

Whether for standard applications or regulated environments, myChamber Control offers a secure, scalable solution for professional device management

NEW! myChamber Monitoring App

Securely monitor your Memmert appliances, no matter where you are

- Monitoring of real-time data from all devices – anytime, anywhere
- Intelligent alarm and warning messages via app or email
- Individual user rights with role and device group control
- Modern and intuitive user interface
- GDPR-compliant data storage on European servers
- Quick installation, compatible with current and older devices

Discover also the new **myChamber LIMS** seamlessly connects your Memmert devices to your laboratory information management system with relevant process data is automatically recorded and transferred in standardised CSV format. **myChamber Link** is Memmert's digital interface for the seamless integration of your devices into IT, automation and software landscapes.

Using a standardised REST API, the solution enables secure data exchange and, depending on the configuration, remote monitoring and control.

Spectrophotometer NANOCOLOR® Advance

Smart into the future

The spectrophotometer NANOCOLOR® Advance combines the most important features of our portable compact photometer PF-12 Plus and our high-precision spectrophotometer NANOCOLOR® VIS II.

It provides precise and reliable measurement results in the daily laboratory routine and can also be used **mobile** due to its **rechargeable battery**. With its **wavelength spectrum of 340 - 800 nm** it allows the measurement of all photometrically evaluable test kits from MACHEREY-NAGEL. The NANOCOLOR® Advance can therefore be used universally in the entire spectrum of water and wastewater analysis.

- **Barcode technology:** automatic detection of parameter and simultaneously turbidity (NTU)
- **Robust:** certified outdoor usability with internal rechargeable battery
- **Universal:** large spectrum of evaluable test kits (NANOCOLOR/VISOCOLOR ECO/PP)
- **Intuitive:** Icon-based menu navigation on the touch screen
- **Cuvette holder:** for 16/24mm round tubes, 10/20/40 and 50 mm rectangle cuvettes
- **Data memory:** 1000 measurement results, 1000 IQC results, 100 scans
- More than 200 pre-programmed tests and special methods
- 99 fully programmable methods: absorbance, transmission, factor, kinetics, scan, nephelometric turbidity measurement

Thermoblock NANOCOLOR® VARIO C2 & VARIO 4

Fast and reliable sample digestions

The NANOCOLOR VARIO C2/4 enables a fast and safe performance of all kinds of sample digestions required in water and waste water analysis. The standard parameters for routine digestions such as **COD, TOC, total nitrogen, total phosphorus and metals** are **pre-programmed** in the heating blocks and help the user to avoid mistakes. For **up to 12/24 (2 x 12) samples** in parallel, with the NANOCOLOR VARIO 4 two heating units can be controlled separately.

- **Easy:** touch screen with intuitive user guidance
- **Fast:** extremely short heating-up times
- **Safe:** lockable protective lids for maximum safety
- **Secure:** internal quality control via NANOCOLOR® T-Set

NANOCOLOR® Heating blocks

Photometer and heating block service

Still meet the necessary requirements?

Photometer inspection with NANOCONTROL NanoCheck 2.0

To check if your photometer still meets the necessary requirements for obtaining reliable results in accordance to ISO 9001 we offer an inspection service for your NANOCOLOR® filter- or spectrophotometer. In this service we check if the accuracy and linearity of the photometer for all different wavelengths in the filter photometer and the range of your spectrophotometer are met to the analytical quality standards. With the inspection executed by our trained personnel you will receive an **official certificate so your next audit will be a breeze**. We recommend a yearly inspection.

Heating block calibration with NANOCOLOR® USB T-Set

To check if your sample digestion is still reliable we offer a calibration service for your NANOCOLOR® heating blocks for a comprehensive analytical quality assurance. In this service we use an electronic temperature sensor which measures the actual temperatures and compares them to the nominal temperatures that have been programmed in the heating block. The heating block will internally adjust itself after this. We can provide you with a comprehensive test protocol for internal documentation. Our trained personnel will provide you **with an official certificate** for you next audit.

Photometer and heating block inspection	Reference	Price*

NANOCOLOR® tube tests

Smart technology with barcode

- **Easy testing:** step-by-step pictogram instructions
- **Safe:** no direct exposure to dangerous chemicals
- **Reliable:** most tube tests comply with international standards
- **Precise:** predosed reagents for highly reproducible results

Already own a HACH DR3900 or DR6000 photometer? Use now our MACHEREY-NAGEL **NANOCOLOR® tube tests on your device** with the conversion kit! Contact us for more information.

- **Efficient:** reduces operating costs without additional investment
- **Intuitive:** user-friendly with automated method import and easy kit processing
- **Reliable and verified measurements**

FiveGo™ portable meters

Reliable analysis wherever you are

The FiveGo™ portable meters combine **accuracy, reliability and ease of use in a compact and robust design**. These portable instruments deliver fast and dependable measurements for **pH, conductivity and dissolved oxygen** for laboratory and field applications,.

With **intuitive operation, a clear display and durable waterproof construction** make routine analysis simple and efficient.

Their **portable design and reliable performance** make them the ideal solution for environmental monitoring, food and beverage testing, education and industrial quality control.

**Discover the quality of Heidolph's Rotary Evaporators
Hei-VAP Ultimate Control with Hei-VOLUME Distimatic Pro**

**Bench-top package
for high volumes & small footprint**
Automation to increase performance and reproducibility

- Various modes for carrying out complex applications
- Simple creation of profiles
- Production of defined distillate quantities
- Dispensing of viscous concentrates from the rotary flask
- Manual mode for processing small quantities

Automation for continuous distillation

- Calibration-free sensors monitor the process
- Automatic filling and emptying
- 24/7 operation - without supervision
- No pressure fluctuations during the entire process cycle
- System shutdown including peripherals at the end of the process

High level of user-friendliness

- Recording and exporting of all process data possible
- All components in contact with solvents are made from FDA-compliant materials
- All process parameters at a glance thanks to 7" touch display

**Discover new products from Heidolph
Hei-SHAKE Salto Core**

- Speed: 1 – 32 rpm
- Made for various type of vessels up to 300 mm height and 136 mm diameter
- Capacity for up to 12 bottles
- Display and timer for an easy control of the process parameters
- RS232 for remote control and data recording via software

Hei-SHAKE Orbital Core

- Reliable, high-capacity orbital mixing for demanding lab applications
- Compact, robust design for continuous, long-term operation
- Flexible platform configurations to match different vessel types and workflows
- Intuitive controls and easy setup for maximum user convenience
- Large load capacity up to 15 kg
- 20 mm orbit
- Speed: 1 - 530 rpm

Request your quote!

Centrifuge 5910 Ri

Refrigerated centrifuge with high capacity and performance in a compact footprint

- 7-inch VisioNize® touch interface for fast, intuitive, and error-free operation
- Favorites and program functions with up to 99 stored programs for quick, reproducible runs
- User management and full run documentation supporting GLP/GxP compliance, with PDF/CSV export
- Exceptional rotor versatility, including fixed-angle and swing-bucket rotors for a wide range of applications
- Universal swing-bucket rotor concept allowing tubes, plates, and bottles without changing adapters
- Ergonomic and quiet design with low access height and soft-touch automatic lid closure
- Advanced temperature control and safety features, including fast pre-cooling, rotor recognition, and imbalance detection

MixMate®

The 3-in-1 mixer for plates, tubes, and vortex mixing

The ^{2D}Mix-Control technology mixes liquids in a controlled, circular orbital movement with a diameter of 3 mm and up to 3,000 rpm.

Generates excellent mixing performance, even for challenging samples.

The MixMate provides enough mixing power to handle also challenging mixing tasks. Most samples are efficiently mixed within less than a minute independent of vessel geometry or sample properties.

MF 3(a) PES Magnetic Filter Holder

Patented!

- Designed with double-layer magnets to ensuring a tight seal
- User-friendly design allowing one-handed operation
- Prevent possible twisting and tearing of the membrane
- Compatible with various kinds of bottle, vacuum flask
- Made of Polyether sulfone (PES)
- Available in 300 & 500 mL
- RoHS certification
- Volume error $\leq 2.5\%$

SF Stainless Steel Filter Funnel

- Clamp-free spin-lock design
- Precise laser-marking ensures high volume accuracy
- Membrane guide at the support base helps position membrane easily
- Forceps access points on support base to easy retrieve membrane
- SS316 funnel is shatterproof, durable and can be fast sterilized by flame
- Volume error $\leq 2.5\%$

VF 3 Filtration Apparatus

- Suitable for purification of organic, corrosive liquid such as solvent, mobile phase for HPLC, GC and AA analysis.
- Including:
 - Ground joint flask (1000 mL)
 - Silicone fixing sucker
 - Glass funnel, 300 mL
 - Auminum camp, 47mm
 - Sintered glass support base w/ tubulated cap with screwthread connector

MF 31 Filtration Apparatus

- Suitable for vacuum filtration, microbiological test & suspended solids test
- Including:
 - MF 3, Magnetic PES filter holder (300 mL) 47 mm with PP lid and support base
 - Silicone stopper (No.8)
 - Receiver flask with drain, 1000 mL (with screwthread connector)
 - Silicone fixing sucker

MultiVac Vacuum Filtration Systems
Economical kit for filtration with large number samples

MultiVac 310 / 610-MS-A

Including:

- **Alligator 200, Diaphragm Liquid Pump**
 - Max. vacuum: 313 mbar abs.
 - Max. liquid flow rate: 4.5 L/min
- **MultiVac System**
 - 310-MS, 3 Places Aluminum Manifold
 - 610-MS, 6 Places Aluminum Manifold
- **MF 3, 300 ml Magnetic Filter Holders (3/6 pcs)**
- **Silicone Tube (2 pcs)**

MultiVac 301-MB-A / 601-MB-A

Including:

- **Alligator 200, Diaphragm Liquid Pump**
 - Max. vacuum: 313 mbar abs.
 - Max. liquid flow rate: 4.5 L/min
- **MultiVac System**
 - 300-MB, 3 Places Stainless Steel Manifold
 - 600-MB, 6 Places Stainless Steel Manifold
- **SF, 100 ml Stainless Steel Funnel (3/6 pcs)**
- **Dragon 100, Torch Burner**
- **MCE Membrane, 47 mm, 0.45 μ m, 100/PK**
- **Silicone Tube (2 pcs)**

Microlab 700 Dispensers

For tasks too small to automate and too large to reliably accomplish by hand

The Microlab 700 is a **highly precise syringe pump** with a **new generation touchscreen controller** that brings a superior technological solution, an **interface designed to quickly and easily dilute and dispense fluids**.

Accurately dispense **volatile, viscous, and dense liquids** independent of atmospheric influences. The **inert fluid path is compatible with harsh chemicals**, making the Microlab 700 the most reliable and robust dispensing system available.

This positive displacement system provides better than **99% accuracy**, independent of a liquid's viscosity, vapor pressure, and temperature. The inert fluid path minimizes sample carryover and is compatible with harsh chemicals.

Advantages of the new Microlab 700 Controller

- Innovative possibilities for communication options
- A full range of peripherals and documentation solutions
- Remote Diagnostic Support and Analysis
- Smart data storage Designed for easy integration into
- LIMS systems
- Comply with FDA GLP and GMP, 21 CFR Part 11

Qualitix® sterilization pouches

Easy and effective wrapping of items requiring sterilization

Made with robust medical grade paper, the pouches tightly close with a self-sealing strip to maintain sterility. Visibility of the content remains through a PET / CPP transparent laminated film.

Suitable for steam and EO gas sterilization, with 2 indicators. Conformity to ISO 17665-06, ISO 11135, CE

Stepper™ 416 repeater pipette & Ecostep™ syringes

Reliable dispensing within 10 to 5000 µL

- Selection among 53 different volumes (19 per syringe)
- Up to 73 doses per filling
- 4 finger activation eliminates thumb fatigue
- Clear indication of volumes and number of aliquots
- Quick insertion and removal of syringes
- Self-locking mechanism
- 2 year warranty on Stepper™ 416

Eppendorf Xplorer® (plus) 8-channel pipettes

Electronic air-cushion pipette for optimal simplicity, precision and reproducibility

Intuitive “up is up, down is down” rocker control and a clear color display ensure easy, error-free operation. An ergonomic design with spring-loaded tip cone reduces attachment and ejection forces. Smart adjustment options ensure consistent results across different liquids and conditions. Long battery life enables extended use, even while charging.

ACT®-labeled pipettes support more sustainable laboratory practices.

Eppi® Eppendorf Safe-Lock® Tubes BioBased

Certified safety, quality, and sustainable performance

- Manufactured from biobased polypropylene, using second-generation recycled feedstock to support more sustainable laboratory practices.
- High resistance to chemicals, mechanical stress (30,000 × g) and temperature range (-86 °C to 100 °C).
- Hinged Eppendorf Safe-Lock lid prevents unintentional lid opening during incubation and storage, precise lid sealing for minimal evaporation rates during long-term storage, frosted lid and surface on the side for easy labeling
- Autoclavable when open (121 °C, 20 min) 14 % discount!

MACHEREY-NAGEL's robotic partners & automation expertise

MN has developed partnerships with various automated platform manufacturers in order to offer multiple validated DNA/RNA extraction workflow solutions.

Their strong cooperation with industry leading robotics collaborators along with extensive automation expertise allows us to offer personalized technical support and assistance. **Click on the logos** below to learn more about, **verified applications, and ready-to-go scripts** for liquid handlers and magnetic rod processors.

Do you have complex or unusual sample matrices or do you want to adapt reagents or protocols to your automation system? Personal application support is available before and after purchasing. MACHEREY-NAGEL's automation experts, R&D, and technical support specialists assist with script generation and method adaptation to ensure smooth processing. Please contact us for personal assistance.

Bambanker™ Cryopreservation Medium

Free samples!

Serum-free, ready-to-use media for secure long-term cell storage

- Enables long term cell storage at -80°C or -196°C
- Ensures over 90% viability and recovery of even the most sensitive cell lines
- Ready-to-use freezing media – no programmed or sequential freezing required
- Serum-free, no risk of contamination
- GMP manufactured with long shelf life
- Usable for all known cell lines

25 % discount

Bambanker™	Reference	Price	Now*
5 x 20 mL	NG BB02	€167.40	€ 125.55
100 mL	NG BB05	€131.75	€ 98.81

FastGene® EasyFlow

Request your demo!

- Ergonomic, lightweight design
- Precise speed control by thumb wheel
- Blow-out and gravity dispense selection
- Long-lasting lithium battery, usable while charging
- Compatible with 1–100 mL pipettes

FastGene® EasyFlow	NG FG-SPC	€308.50	€ 262.23

FastGene® CapEasy

- Improved one-handed operations
- For diverse screw cap tubes with a cap diameter of 11-40 mm
- 5 operation modes available
- Compact design with a small footprint

15% discount

Product	Reference	Price	Now*
FastGene® CapEasy	NG FG-CDC05	€1075.40	€ 914.09

FastGene® Cell Culture Chamber

- Protects your cell cultures during transport and incubation by providing a sterile barrier against contaminations
- Smart, sterile design with replaceable <0.4 µm filter allows air and moisture exchange while blocking pathogens
- Fully autoclavable up to 121 °C
- Suitable for: Petri dishes, T25 flasks, T75 flasks, 6-well plates, 12-well plates, 24-well plates, 96-well plates

25% discount

FastGene® Cell Culture Chamber	NG CC01	€462.00	€ 346.50

FastGene® Cryo Tubes (2 mL)

- High-quality sterile 2 mL cryo tubes
- Temperature-resistant: -196°C to + 121°C
- Wide opening for easy tissue storage
- Free of RNases and DNases, endotoxin-free

30% discount

Product	Reference	Price	Now*
FastGene® Cryo Tubes (2 mL)	NG FG-CRY-20S	€238.90	€ 167.23

Bambanker™ Cryopreservation Method

No Serum Dependency

Bambanker™ is serum-free, ensuring consistent results without lot-to-lot variability.

No Stepwise Freezing

Direct freezing at -80°C with ready-to-use medium, eliminating time-consuming procedures.

Simplified Protocol

Only requires resuspension in Bambanker™, transfer to cryovials, and freezing—no special equipment needed.

Conventional Cryopreservation Method

Serum Requirement

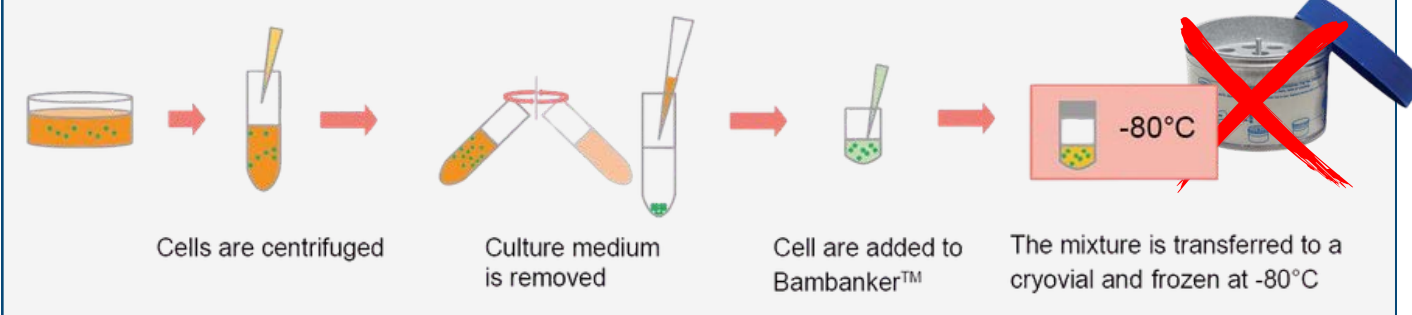

Cells are resuspended in a cryopreservation medium containing fetal bovine serum (FBS), which adds variability and risks contamination.

Stepwise Freezing

Cells are frozen gradually at a controlled rate, often requiring a programmable freezer or liquid nitrogen for consistency.

Time-Consuming Process

Sequential temperature adjustments are necessary to prevent ice crystal formation and ensure cell viability.

Bambanker™ Variants

Bambanker™ Direct

- Perfectly suited for hybridoma cells and HTP-applications
- Added directly to the cells, no washing and no centrifugation necessary

Bambanker™ DMSO Free for the most sensitive cells

Bambanker™ hRM

- For primate ES and iPS cells
- Made with human serum albumin, no other animal components

25 % discount

Bambanker™	Reference	Price	Now*
Direct (20 mL)	NG BBD01	€76.10	€ 57.08
DMSO-free (20 mL)	NG BBF01	€102.40	€ 76.80

Filter Service offers a complete range of cell culture products and equipment to support reliable, sterile, and efficient workflows. From high-quality media and sera to plastics, instruments, and safety solutions.

Cell Culture Media & Reagents

Reliable, ready-to-use solutions for consistent cell growth and handling.

Ensure consistent, contamination-free cell growth with ready-to-use, high-quality media and reagents. Comprehensive range of high-quality media, sera, and reagents for reliable and reproducible cell culture workflows.

- Classical media (DMEM, RPMI, MEM, IMDM, Ham's F12)
- Fetal Bovine Serum (FBS) and other sera (multiple origins)
- Serum alternatives and supplements
- Buffers (PBS, HBSS, EBSS)
- L-glutamine, antibiotics, and additives
- Trypsin-EDTA and detachment reagents
- Chemically defined and specialized media
- Custom media formulations

Chemicals for HPLC

At Filter Service, we understand the importance of reliable solvent availability in HPLC and LC-MS analysis. We **maintain a stock of our most frequently used HPLC chemicals from J.T. Baker** at our headquarters in Eupen.

Next to this we also offer a broad range of HPLC Chemicals from **CHEMSOLUTE®**.

A carefully selected line of Chemicals for HPLC is available, offering high-purity solvents suitable for isocratic and gradient applications. These solvents are formulated to support stable baselines, low UV cut-off values, and reliable chromatographic performance. The complete portfolio of CHEMSOLUTE® covers a wide spectrum of chemicals, from solvents and reagents to acids, bases, salts, and special products, all supplied with a strong focus on quality, consistency, and clear documentation.

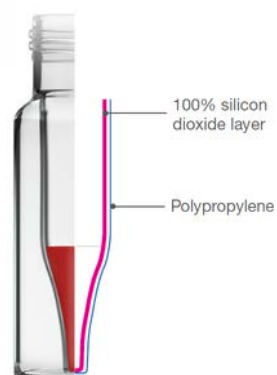

[Discover here our pricelist for HPLC Chemicals from J.T. Baker & CHEMSOLUTE®](#)

For customers with predictable or recurring consumption, we also **offer the option to maintain a designated stock upon request**. By reserving agreed quantities specifically for your laboratory, we can further improve supply continuity and reduce the risk of unexpected shortages. In case of further questions, do not hesitate to contact us!

NEW! SureSTART™ GOLD Low-Bind vials

High performance vials, low binding from polypropylene

Thermo Scientific™ SureSTART™ GOLD-Grade Polypropylene Vials are developed as low-bind products and designed with non-specific binding (NSB) in mind. These vials have been coated with a layer of 100% silicon dioxide, providing superior chemical inertness and performance. The surface is free from anions and cations, minimizing adsorption and helping ensure that even trace-level samples are reliably recovered.

Ideal for working with biomolecules or bio-related analytes (peptides, proteins, aminoacids...). Do not hesitate to contact us for more information!

The Thermo Scientific™ SureSTART™ Collection offers a complete and streamlined range of sample handling consumables, including vials, caps, inserts, well plates, mats, and kits for a confident workflow in chromatography and mass spectrometry. Designed for performance, consistency, and broad instrument compatibility. With three distinct performance levels tailored to everyday analysis, high-throughput workflows, and the most demanding applications, this collection ensures that your sample integrity and data quality are supported from the very first step of your analytical journey. [Discover here more information regarding the SureSTART™ Collection.](#) Contact us for more information!

Rivaqua: Demineralised water installations

Demineralised water installations, Tailored to your specific requirements

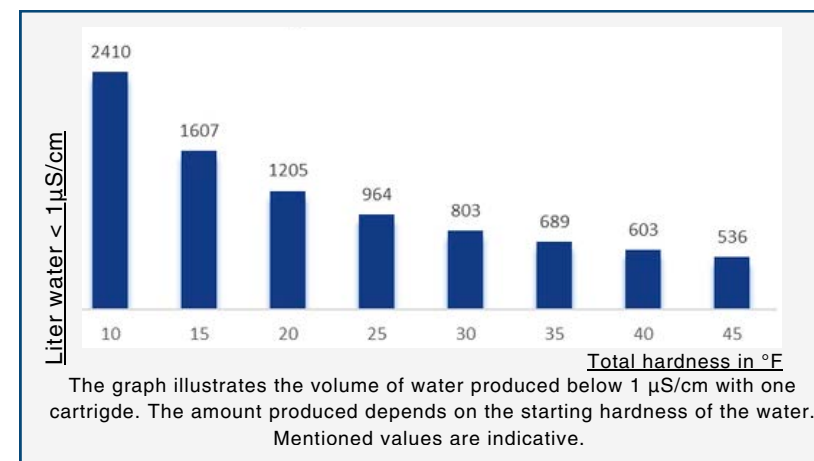

- Customised setups for the production of demineralised water from tap water
- Removing minerals from the water supply, achieved through a combination of anionic and cationic resins.
- Conductivity meters with visual indication or digital read-out possible
- Reverse osmosis installations and softeners possible

Installation	Reference	Price
1 cartridge of mixed ion exchange resin (20 liters) + visual conductivity meter 5 µS/cm alarm set	RV DEMI COND 20	€ 908.00
1 cartridge of mixed ion exchange resin (20 liters) + digital conductivity meter 0.1-20 µS/cm alarm set	RV DEMI COND DIGIT 20	€ 1305.00
2 cartridge of mixed ion exchange resin (20 liters) + visual conductivity meter 5 µS/cm alarm set	RV DEMI COND 2x20	€ 1391.00
2 cartridge of mixed ion exchange resin (20 liters) + digital conductivity meter 0.1-20 µS/cm alarm set	RV DEMI COND DIGIT 2x20	€ 1740.00
New 20-liter cartridge	RV DEMI 20	€ 526.00
Additional visual conductivity meter 5 µS/cm alarm set	RV DEMI COND	€ 217.50
Additional digital conductivity meter 0.1-20 µS/cm alarm set	RV DEMI COND DIGIT	€ 580.00
Installation costs	RV DEMI INSTALLATION	€ 200.00
Flow- regulated water gun	RV DEMI GUN	€ 62.50
Regeneration of a 20-liter cartridge	RV DEMI 20 REG-2	€ 259.39

If you require a customized setup, feel free to reach out to us.

If necessary adjustments need to be made to your existing water system, additional charges may apply.

Valid until 31.12.2026

Regeneration service

Over time, the resins reach saturation and the cartridge requires regeneration. A Filter Service driver collects the used cartridge while delivering a regenerated cartridge. **Enjoy now your first regeneration for free when ordering a new Rivaqua system before 30.06.2026.** Mention code **RIVAQUA_REG_26** when ordering your regeneration.

Installation costs

The first consultation visit is for free, but for installation by our technician additional costs apply, based on your location in Belgium / Luxembourg. Our technician starts from Lixhe, with distances mentioned one way.

- 0-25 km - Free
- 25 - 50 km - € 100.00
- 50 - 100 km - € 200.00
- 100-150 km - € 300.00
- >150 km - € 400.00

CSLM: Maintenance of equipment

Together with our partner CSLM we can provide a full range of services to meet all needs for specific types of equipment. To ensure the safety of your staff, it is essential that all crucial laboratory equipment undergoes regular inspection and maintenance. (stipulated in the Belgian Official Gazette, Articles 320 to 326)

- Centrifuges
- Universal ovens
- CO₂ incubators
- Cryostats
- Ultracentrifuges
- Cryothermostats

CSLM offers a range of services covering all needs for specific types of equipment, including **installation (IQ/OQ/PQ), inspection, maintenance, troubleshooting, metrology, and usage & maintenance advice.** CSLM's **expertise** has been recognized by institutions **for over 30 years**, providing support **for all brands.**

With many years of experience working with centrifuges and laboratory equipment, the technicians bring in-depth expertise to every intervention. Their knowledge ensures precise diagnostics, efficient maintenance, and high-quality service to keep your equipment in optimal condition.

Even for brands that are no longer on the market, CSLM can help you.
With a stock of new, used and replacement parts for models from the oldest to the most recent.

Service levels

- **Regulatory periodic inspection:** verification of safety points, manufacturer recommendations, and terminal parameters
- **T1 - preventive maintenance:** includes the regulatory inspection plus lubrication, dust removal, and minor adjustments
- **T1P - maintenance with parts:** T1 plus replacement of wear parts if necessary
- **Optional: metrology services**
 - Standard verification: one measurement per parameter
 - Program verification: one measurement per program
 - ISO 17025 accredited verification: nine measurements per speed with a certificate of compliance

Maintenance service description

During each maintenance visit, CSLM performs:

- Equipment identification and functionality check
- Complete cleaning and lubrication of mechanical parts
- Inspection of all control points and safety features
- Compliance validation with labor regulations
- Mechanical adjustments and calibration
- Replacement of worn parts
- Report discussion with the responsible supervisor
- Delivery of a detailed inspection report, also available online

Delivery conditions

Fast and personalized deliveries

Due to our strategic position in Eupen, close to the German border and adjacent to the E40 motorway, Filter Service guarantees quick and effective distribution from surrounding countries across Belgium.

By managing our own logistics, we combine speed, flexibility, and sustainability, so you can always rely on precise and reliable deliveries, where you need them. Our drivers know your preferences and deliver at the right place and time. Flexible, personal, and tailored to your needs. 95% of deliveries are handled by our own drivers.

Costs

For all orders over €250 are delivered free to your address.

For orders under €250, we charge a €25 delivery fee.

Want to remain up-to date regarding our promotions and other news?

Our monthly newsletter subscription keeps you informed about the latest promotions, newly added suppliers, and the comprehensive services we are pleased to offer.
