PROCESS DETAIL		
Which solvent(s) do you want to evaporate?		
What volume do you want to evaporate?	Per batch	litre
	Per day	litre
	Per week	litre
2/6/ / /		
What is the goal of the process? (Short description)		
What is the goal of the process? (Short description)		
What is the goal of the process? (Short description)		
What is the goal of the process? (Short description)		
What is the goal of the process? (Short description)		
What is the goal of the process? (Short description)  What equipment are you currently using to run the process?		
	AND AUTOMATION	
What equipment are you currently using to run the process?	AND AUTOMATION	
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A What are you focused on?	Performance	Precision
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A  What are you focused on?  Is your application a powder drying process?		Precision No
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A  What are you focused on?  Is your application a powder drying process?  Is your application a botanical extraction process?	Performance Yes Yes	No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process?  Does your mixture tend to foam during the process?	Performance Yes Yes Yes	No No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process?  Does your mixture tend to foam during the process?  Do you want to work fully automated 24/7 with the unit?	Performance Yes Yes Yes Yes	No No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process?  Does your mixture tend to foam during the process?	Performance Yes Yes Yes	No No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process?  Does your mixture tend to foam during the process?  Do you want to work fully automated 24/7 with the unit?	Performance Yes Yes Yes Yes	No No No No Distillate
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit?  What is your product of interest?	Performance Yes Yes Yes Yes Residue	No No No No Distillate
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A  What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit?  What is the expected viscosity of the residue?	Performance Yes Yes Yes Yes Residue mpa	No No No No Distillate
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?	Performance Yes Yes Yes Yes Residue ———— mpa	No No No No Distillate  No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION / What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids? Is the residue light sensitive?	Performance Yes Yes Yes Yes Residue mpa Yes  Particle size Yes	No No No No Distillate  No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?	Performance Yes Yes Yes Yes Residue ———— mpa	No No No No Distillate  No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION / What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids? Is the residue light sensitive? Do you want to use automatic boiling point detection?	Performance Yes Yes Yes Yes Residue mpa Yes  Particle size Yes	No No No No Distillate  No No
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only)	Performance Yes Yes Yes Yes Residue ————— mpa Yes Particle size Yes Yes	No No No No Distillate  No No No
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use?	Performance Yes Yes Yes Yes Residue  ————— mpa Yes  Particle size Yes Yes Yes Yes	No No No No Distillate  No No House vacuum
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use?	Performance Yes Yes Yes Yes Residue  ———————————————————————————————————	No No No No Distillate  No No House vacuum
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use?	Performance Yes Yes Yes Yes Residue  ———————————————————————————————————	No No No No Distillate  No No House vacuum
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use? How do you want to control your vacuum? (Benchtop only)	Performance Yes Yes Yes Yes Residue  mpa Yes  Particle size Yes Yes Yes Vacuum pump Display on board Manually external	No No No No Distillate  No No House vacuum Digital external
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use? How do you want to control your vacuum? (Benchtop only)	Performance Yes Yes Yes Yes Residue  mpa Yes  Particle size Yes Yes Yes Vacuum pump Display on board Manually external  Chiller	No No No No Distillate  No No House vacuum Digital external
What equipment are you currently using to run the process?  QUESTIONNAIRE – PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use? How do you want to control your vacuum? (Benchtop only)	Performance Yes Yes Yes Yes Residue  mpa Yes  Particle size Yes Yes Yes Vacuum pump Display on board Manually external  Chiller	No No No No Distillate  No No House vacuum Digital external
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION A What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use? How do you want to control your vacuum? (Benchtop only) Which cooling source do you want to use?	Performance Yes Yes Yes Yes Residue  mpa Yes  Particle size Yes Yes Vacuum pump Display on board Manually external  Chiller Tab water	No No No No Distillate  SS No No House vacuum Digital external
What equipment are you currently using to run the process?  QUESTIONNAIRE - PROCESS EVAPORATION / What are you focused on? Is your application a powder drying process? Is your application a botanical extraction process? Does your mixture tend to foam during the process? Do you want to work fully automated 24/7 with the unit? What is your product of interest? What is the expected viscosity of the residue? Does the residue contain solids?  Is the residue light sensitive? Do you want to use automatic boiling point detection? (Batch only) Which vacuum source do you want to use? How do you want to control your vacuum? (Benchtop only) Which cooling source do you want to use?	Performance Yes Yes Yes Yes Residue  mpa Yes  Particle size Yes Yes Vacuum pump Display on board Manually external  Chiller Tab water	No No No No Distillate  No No House vacuum Digital external  Dry ice

## ADDITIONAL INFORMATION

I agree that my data may be used by the company Heidolph Instruments GmbH & Co. KG, Ludwigsplatz 8, 93309 Kelheim for the purpose of passing on information in the form of a newsletters as well as direct advertising and the implementation of customer surveys (both by telephone and E-mail), be processed and used. The collection, processing and use of my data is on a voluntary basis. I can withdraw my consent at any time with effect for the future. A detailed data protection information according to Art. 13 I find DSGVO online at https://heidolph-instruments.com/en/footer/privacy-policy
